

# Modern Concepts of Cardiovascular Disease

## CONTENTS

Volume XXXVIII: January-December, 1969

<b>PULMONARY EDEMA, <i>Herbert N. Hultgren and M. D. Flamm</i></b>	1
<b>RADIOLOGICAL CONCEPTS IN THE EVALUATION OF HEART DISEASE (II), <i>Richard C. Lester</i></b>	7
<b>THE THERAPY OF DISSECTING ANEURYSM OF THE AORTA, <i>Joseph Lindsay, Jr.</i></b>	13
<b>THE RENIN-ANGIOTENSIN SYSTEM IN CURABLE HYPERTENSION, <i>Edgar Haber</i></b>	17
<b>THE THYROID STATE AND THE CARDIOVASCULAR SYSTEM, <i>James J. Leonard and William J. deGroot</i></b>	23
<b>CENTRAL AUTONOMIC INFLUENCES ON CARDIAC RATE AND RHYTHM, <i>Stewart Wolf</i></b>	29
<b>QT PROLONGATION AND SUDDEN DEATH, <i>Thomas N. James</i></b>	35
<b>THE U WAVE OF THE ELECTROCARDIOGRAM, <i>E. Lepeschkin</i></b>	39
<b>BETA ADRENERGIC BLOCKADE IN CARDIOVASCULAR THERAPY, <i>Bertram Pitt and Richard S. Ross</i></b>	47
<b>RATIONALE AND LIMITATIONS OF HEMODYNAMIC MEASUREMENTS IN PATIENTS WITH ACUTE MYOCARDIAL INFARCTION, <i>Elliot Rapaport and Melvin Scheinman</i></b>	55
<b>ECHOCARDIOGRAPHY, <i>Bernard L. Segal</i></b>	63
<b>ABNORMAL PHYSICAL FINDINGS ASSOCIATED WITH MYOCARDIAL INFARCTION, <i>Mark E. Silverman and J. Willis Hurst</i></b>	69

Volume XXXIX: January-December, 1970

<b>RECENT ADVANCES IN THE UNDERSTANDING OF CONGESTIVE HEART FAILURE (I), <i>James F. Spann, Jr., Dean T. Mason and Robert F. Zelis</i></b>	73
<b>RECENT ADVANCES IN THE UNDERSTANDING OF CONGESTIVE HEART FAILURE (II), <i>James F. Spann, Jr., Dean T. Mason and Robert F. Zelis</i></b>	79
<b>SPLANCHNIC VASCULAR SYNDROMES, <i>Eliot Corday and John K. Vyden</i></b>	85
<b>THE SECOND HEART SOUND: A SCREENING TEST FOR HEART DISEASE, <i>Robert J. Adolph and Noble O. Fowler</i></b>	91
<b>THE CONCEPT OF PRECORONARY CARE, <i>Bernard Lown and William Ruberman</i></b>	97
<b>CONSTANT MONITORING FOR CARDIAC DYSRHYTHMIAS AND BLOCKS, <i>Henry J. L. Marriott and Elizabeth Fogg</i></b>	103
<b>ALCOHOL AND THE HEART, <i>Jere H. Mitchell and Lawrence S. Cohen</i></b>	109
<b>THE BURDEN OF A HOT AND HUMID ENVIRONMENT ON THE HEART, <i>G. E. Burch and Thomas D. Giles</i></b>	115
<b>PHYSIOLOGICAL AND PHARMACOLOGICAL MANIPULATIONS OF HEART SOUNDS AND MURMURS, <i>Michael C. Dohan and Modestino G. Criscitiello</i></b>	121
<b>CHANGING CONCEPTS IN ELECTROCARDIOGRAPHY, <i>Thomas N. James</i></b>	129
<b>CARDIOPULMONARY RESUSCITATION 1970, <i>James R. Jude and Eugene L. Nagel</i></b>	133
<b>THE HEMIBLOCKS: DIAGNOSTIC CRITERIA AND CLINICAL SIGNIFICANCE, <i>Mauricio B. Rosenbaum</i></b>	141

# Modern Concepts of Cardiovascular Disease

## SUBJECT INDEX

Volumes XXXVIII-XXXIX

1969-1970

### A

- Alcohol, acute and chronic effects on the heart, 109
- Aldosterone, renin-angiotensin system in curable hypertension, 17
- Aneurysm, therapy of dissecting aneurysm of the aorta, 13
- Angina pectoris,  $\beta$ -adrenergic receptor blockade in therapy of, 47
- Angiotensin, renin-angiotensin system in curable hypertension, 17
- Arrhythmias, central autonomic influences on cardiac rate and rhythm, 29
- Atherosclerotic heart disease, coronary, and need for precoronary care, 97
- Auscultation:
  - in patients with acute myocardial infarction, 69
  - physiological and pharmacological manipulation of heart sounds and murmurs, 121
  - the second heart sound as screening test for heart disease, 91
- Autonomic nervous system, influences on cardiac rate and rhythm, 29

### B

- Beta-adrenergic blockade, in cardiovascular therapy, 47
- Block:
  - constant monitoring for heart block, 103
  - electrocardiograms and, 129
  - the hemiblocks, 141

### C

- Capillaries, pulmonary capillary pressure in pulmonary edema, 1
- Cardiac arrest, cardiopulmonary resuscitation in, 133
- Cardiac output, measurements in acute myocardial infarction, 55
- Cardiopulmonary resuscitation; concepts, methods, training, evaluation, and trends, 133
- Cardiovascular disease:
  - echocardiography in diagnosis of, 63
  - effects of heat and humidity on persons with, 115
  - need for precoronary care, 97
  - roentgenograms in evaluation of, 7
  - second heart sound as test for, 91

### Cardiovascular system:

- effects of heat and humidity on, 115
- the thyroid state and, 23
- Catecholamines, cardiac, loss of in congestive heart failure, 79
- Celiac artery, occlusion, insufficiency, ischemia, 85
- Climate, effects of heat and humidity on the cardiovascular system, 115
- Congestive heart failure:
  - current concepts in understanding of, 73, 79
  - and the thyroid state, 23
- Coronary atherosclerotic heart disease, and precoronary care, 97
- Coronary care unit, and the concept of precoronary care, 97

### D

- Deafness, and heritable QT prolongation, 35

### Diagnosis:

- acute myocardial infarction
  - abnormal physical findings in, 69
  - hemodynamic measurements in, 55
- auscultation
  - in acute myocardial infarction, 69
  - manipulation of heart sounds and murmurs, 121
  - second heart sound as test for heart disease, 91
- constant monitoring for cardiac dysrhythmias and blocks, 103
- echocardiography in cardiovascular disease, 63
- hemiblocks, 141
- pulmonary edema, 1
- roentgenograms in evaluation of heart disease, 7
- Dissecting aneurysm, of the aorta, therapy, 13
- Dysrhythmias:
  - $\beta$ -adrenergic receptor blockade in therapy of, 47
  - constant monitoring for, 103
  - QT prolongation and, 35

### E

- Echocardiography, principle and technique, 63
- Edema, pulmonary, 1

**Electrocardiogram:**  
 changing concepts, 129  
 constant monitoring for dysrhythmias and blocks, 103  
 and diagnosis of the hemiblocks, 141  
 QT prolongation and sudden death, 35  
 the U wave, 39  
**Embolism, pulmonary, associated with pulmonary edema, 1**  
**Energy, utilization and storage in congestive heart failure, 73**  
**Environment, effects of heat and humidity on the cardiovascular system, 115**  
**Exercise,  $\beta$ -adrenergic receptor blockade and cardiac responses to, 47**

## H

**Head injury, pulmonary edema associated with, 1**  
**Heart:**  
 arrhythmia, central autonomic influences, 29  
 block  
   constant monitoring for, 103  
   the hemiblocks, 141  
   central autonomic influences on rate and rhythm, 29  
 disease  
   and the concept of precoronary care, 97  
   echocardiography in diagnosis of, 63  
   heat and humidity effects on persons with, 115  
   roentgenograms in evaluation of, 7  
   second heart sound as test for, 91  
   effects of alcohol on, 109  
   failure, congestive, 23, 73, 79  
   heat and humidity effects on, 115  
   murmurs, physiological and pharmacological manipulations of, 121  
   rate and rhythm, central autonomic influences on, 29  
 sounds  
   manipulation of in diagnosis, 121  
   second sound as test for heart disease, 91  
   and the thyroid state, 23  
**Heart block:**  
 constant monitoring for, 103  
 the hemiblocks, diagnosis and clinical significance, 141  
**Heart disease:**  
 coronary atherosclerotic, and need for precoronary care, 97  
 echocardiography in diagnosis of, 63  
 effects of heat and humidity on persons with, 115  
 roentgenograms in evaluation of, 7  
 second heart sound as screening test for, 91

**Heart failure:**  
 congestive  
   current concepts in understanding of, 73, 79  
   and the thyroid state, 23  
**Heart rate, central autonomic influences on, 29**  
**Heart sounds:**  
 physiological and pharmacological manipulations of, 121  
 second sound as screening test for heart disease, 91  
**Heat, and humidity effects on the cardiovascular system, 115**  
**Hemiblocks, diagnostic criteria and clinical significance, 141**  
**Hemodynamic measurements, rationale and limitations in acute myocardial infarction, 55**  
**Humidity, effects on cardiovascular system, 115**  
**Hypertension:**  
 $\beta$ -adrenergic receptor blockade in therapy of, 47  
 curable; renin-angiotensin system in, 17  
**Hyperthyroidism, and the cardiovascular system, 23**

## I

**Idiopathic hypertrophic subaortic stenosis:**  
 $\beta$ -adrenergic receptor blockade in therapy of, 47  
 echocardiography in diagnosis and study of, 63  
**Ischemia, recurrent splanchnic vascular, 85**

## M

**Mesenteric artery, occlusion, insufficiency, ischemia, 85**  
**Mitral valve, echocardiograms in diagnosis of disease and study of, 63**  
**Murmurs, physiological and pharmacological manipulations of, 121**  
**Myocardial infarction:**  
 abnormal physical findings associated with, 69  
 acute  
   hemodynamic measurements in, 55  
   and precoronary care, 97

## O

**Occlusion, acute splanchnic vascular, 85**

## P

**Peripheral circulation, alterations in congestive heart failure, 79**  
**Precoronary care, the concept of, 97**

**Propranolol, in cardiovascular therapy, 47**  
**Pulmonary edema, physiological variables and therapeutic measures, 1**

## **Q**

**QT interval, prolongation of and sudden death, 35**

## **R**

**Renin-angiotensin system, in curable hypertension, 17**  
**Resuscitation, cardiopulmonary; concepts, methods, training, evaluation, and trends, 133**  
**Roentgenograms, in evaluation of heart disease, 7**

## **S**

**Second heart sound, screening test for heart disease, 91**  
**Sounds. See Heart sounds**  
**Splanchnic vascular system, functional anatomy, occlusion, insufficiency, ischemia, 85**  
**Sudden death:**  
    **cardiopulmonary resuscitation, 133**  
    **and central autonomic influences on cardiac rate and rhythm, 29**  
    **and the concept of precoronary care, 97**  
    **QT prolongation and, 35**

**Sympathetic nervous system, altered function in congestive heart failure, 79**

## **T**

**Therapy:**  
    **cardiopulmonary resuscitation in cardiac arrest, 133**  
    **cardiovascular,  $\beta$ -adrenergic blockade in, 47**  
    **dissecting aneurysm of the aorta, 13**  
    **for patients with cardiovascular disease in hot and humid weather, 115**  
    **pulmonary edema, 1**  
**Thyroid, and the cardiovascular system, 23**

## **U**

**U wave, of the electrocardiogram, 39**  
**Ultrasound, principle and technique of echocardiography, 63**

## **V**

**Vectorcardiogram, and diagnosis of the hemiblocks, 141**

## **W**

**Weather, effects of heat and humidity on the cardiovascular system, 115**

## **X**

**X-rays. See Roentgenograms**
